PROFILE

Computer science student specialized in Cyber Security. I consider myself a responsible and orderly person . I am looking forward to my first work experience .

PROJECT

CyberGpt (A Chatbot which only answer cybersecurity related queries)

- Designed and developed an AI chatbot specialized in cybersecurity that processes and responds exclusively to security-related queries.
- Enhanced threat intelligence accessibility by enabling real-time, conversational assistance for topics such as penetration testing, network security, vulnerability analysis, and incident response.

TradePulse – Accurate Signals, Anytime, Anywhere.

- TradePulse is a next-generation trading intelligence platform engineered to pinpoint lucrative market opportunities with remarkable accuracy.
- The platform also allows traders to put their own strategies to the test, refining their methods and building a sharper trading edge.

CERTIFICATIONS

- Workshop certification on Python programming from MTTF
- Data analysis using Python from IBM developer skills network
- Workshop certification on Blockchain Web3 and Blockchain from BITSCRUNCH
- Certification on Hack-o-Verse 2024 participation
